Export Control

●Export control is aimed at preventing the proliferation of weapons of mass destruction and other sensitive items to countries and regions of security concern or terrorist organizations. Export transactions of goods and technology that have potential weapons of mass destruction (WMD)/ conventional weapons applications are regulated under laws and regulations.

●To ensure safety by maintaining international peace and security, a license may be required from governmental authorities in order to export or provide products or technologies within this catalog. The regulation for export of cargos and technologies is defined by the following four regimes as well as governmental authorities of each country.

Nuclear Suppliers Group (NSG)
Australia Group (AG)

Missile Technology Control Regime (MTCR)
Wassenaar Arrangement (WA)

●Be sure to comply with each country's export control laws and regulations when exporting or providing products or technologies within this catalog.

※Please contact us if you have any questions.

HICV series

Self Control Valve

The HICV series of control valves achieve constant pressure stability on the downstream regardless of pressure fluctuations from the upstream. The downstream pressure is managed by the pilot air pressure supplied to the HICV.

Self Control Valve

HICV-045CBi*-131

Specifications

Model Code	See Model Selection Table
Orifice Size	φ7 Equivalency [mm]
Connection Size	See Model Selection Table
Recommended Flow Range	4: 0.4~2[L/min] H ₂ O
	5: 1~5[L/min] H ₂ O
	6: 1~5[L/min] H ₂ O
	<small>*The adjustable flow range differs according to the downstream restriction.</small>
Applicable Media	DI Water, Corrosive Fluid
Media Pressure	IN: 0~0.5MPa
	OUT: 0~0.5MPa
Media Temperature	10~90°C
Ambient Temperature	0~40°C
Operational Mode	Single Pilot Type
Pneumatic Pressure	0.1~0.3MPa
Wetted Material	Diaphragm: PTFE
	Valve Body: PTFE
